

Gluco-Sur

Features

- Designed to encourage appetite and reach higher dry matter intake.
- Decreases both subclinical and clinical ketosis in fresh cows, reduce metabolic disorders.
- A specific blend of glucose precursors with synergy and kinetic effects.
- Improve blood glucose for increase energy status of cow.
- Decrease BHBA and stimulate appetite, which leads to better liver function.
- Improve reproduction by lowering BHBA the first 2 weeks of lactation and minimize body weight losses.
- Improve robot frequencies as it is very palatable. Can be top-dressed.
- More appetite = More dry matter intake = More peak milk = More milk!

Available Options

Gluco-Sur Liquid (#2214) 550# Drum or 2500# Tote

Feeding Directions

This feed contains no vitamin or trace mineral supplementation. Feed at a rate of 125 grams to 250 grams per head per day for pre-fresh cows and at a rate of 250 to 500 grams per head per day for fresh cows. Consult your Big Gain representative for complete feeding directions.

Lactation Cows - Day 1 (post calving) = 5.28 oz., Day 2 = 7.05 oz., Day 3 = 8.8 oz., Day 4 = 10.56 oz., Day 5-21 = 12.32 oz., Day 22-30 = 12.32-0 oz.

Clinical Cases - feed 16 oz. for five days or any cows with a 1.6 x more butterfat % than protein %.

Heat Stress - feed 4-8 oz. during heat stress

Pre-fresh Cows - feed 5 oz. per cow per day

Blood Glucose - Optimal levels 51-63 mg/L

Please follow our metabolic blood guidelines, do not exceed 63 mg/L of glucose on average.
